

Visual Timetable Maker

Lesson 14 · Classroom tools · Watch the video and take the quiz online:

lessonplanner.info/training/14-visual-timetable/

Where to find it: Menu → Classroom tools → Visual timetable

What you'll learn

- How to start from an example day or build your own
- How to show the timetable on the board and tick off activities
- When to use Now and next
- The three ways to print it

Step by step

- 1 Start your day.** Open the **Visual Timetable Maker**. Press **Example primary day**, or build your own.
- 2 Add picture cards.** Drag picture cards into your day, or tap a card to add it to the end. Add times if you like.
- 3 Show it on the board.** Press **Show on board** for a big, clear timetable.
- 4 Tick off each activity.** As each activity finishes, press **Done, next**, and it's ticked off.
- 5 Keep it simple.** For children who need it simpler, switch to **Now and next**.
- 6 Print it.** Press **Print** and choose a **Timetable strip**, **Cut-out cards (to laminate)** or a **Now and next board**.

The Visual Timetable Maker with the example primary day.

Tips

- Laminate the cut-out cards and reuse them every day.
- Now and next works well for children who find a full day too much.

Try it

Build tomorrow morning as a visual timetable, then press **Show on board** and try **Done, next**.

Check what you know

- How do you add a picture card to the day?
 - A Drag it in, or tap it to add it to the end
 - B Draw it by hand
 - C Email it
- An activity has finished. What do you press?
 - A Done, next
 - B Delete
 - C Print
- Which view is simpler for children who need it?
 - A Now and next
 - B Full week
 - C Spreadsheet
